

# PowerTOP Xtra

"Each step has to be spot on, especially under extremely tough conditions. That's why I rely on PowerTOP Xtra."

# Slip-proof

humid conditions, snow or dirt through unique rubber coating of the

contact surfaces and the

ergonomic design.

#### 3

kinking.

**Protected:** 

PowerTOP Xtra 63A

available in IP 44 and IP 67 as well as 125A in IP 67.

# Fast connection

Easy and fast installation.

Substantially reduced installation times through largely tool-free installation. Locking slides instead of screws and especially smooth cable gland with integrated strain relief, seal and protection against kinking.

Stable and fast locking without screws.
Unlocking only with just a tool according to the regulations.

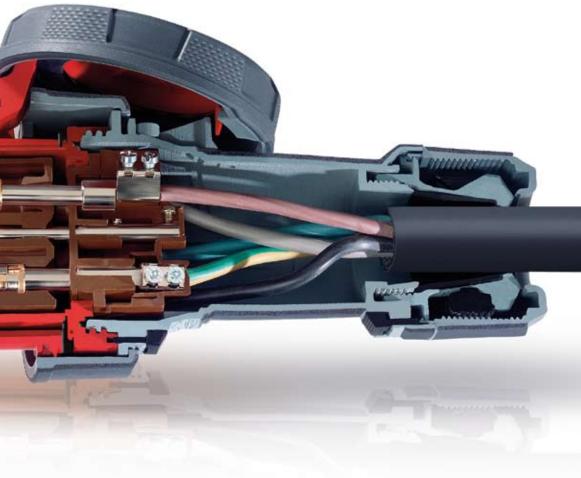

Faster installation:
Screws are only required for conductor connection with screws (63A) or Allen screws (125A).

Comfortable self-locating thread lock between front and back part.

- More comfortable installation thanks to more internal space
- Pilot contact standard with plugs; optionally available for connectors.
   (Part number + index P)
- Conductor diameters for 63A from 6-16 mm<sup>2</sup>, for 125A from 25-50 mm<sup>2</sup>

The proven frame terminals ensure high clamping force and secure contact - even without ferrules on the wires.

Secure contact as well as convenient inserting and withdrawing through SoftCONTACT at 63A and TorsionSpringCONTACT at 125A.

# Protected

#### Clean:

Closed, easy to clean surface: cable gland is always located directly on the plug and connector body.

#### Tough:

The plugs provide better corrosion protection in aggressive environments and at high degrees of air humidity thanks to nickel-plated contacts. More safety through highly heat-resistant contact carriers.

Molded seals in the connector lid and the front part of the plug.

#### Slip-proof:

Even easier inserting and withdrawing through optimum grip, even with working gloves. Best performance at high humidity, snow and dirt thanks to the unique rubber coating of the grip surfaces as well as the ergonomic design.

#### **Durable:**

Connectors with highly heat-resistant contact carriers; nickel-plated contact sleeves also available on request. Pilot contact standard with plugs; optionally available for connectors.

(Part number + index P).

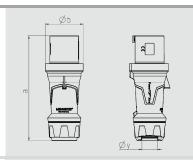

#### Tested:

All PowerTOP Xtra plugs and connectors apply with the amended standard EN/IEC 60 309-2. Touch proof in accordance with EN 50 274.
