

Example of use cases

Outdoor shooting (cinema, TV)

Cameras (500W), LED lighting (1000W), mixing (500W), battery recharging (1000W)

Total consumption : ~ 3000 W

Estimated autonomy **3h15 to 3h30** with 1 Wattman

Mobile stage (concerts, shows)

Sound system (2000W), LED lighting (1500W), mixing console (500W)

Total consumption : ~ 4000 W

Estimated autonomy **5h** with 2 Flywatt

Booth & food truck

Fridge (500W), hob (2000W), cash register and lights (500W)

Total consumption : ~ 3000 W

Estimated autonomy **3h15 to 3h30** avec 1 Wattman

Hybridisation

Automatic start-up of a gas-powered unit

Estimated autonomy **infinite** with 1 Rock-E

Solar life base

Lighting (1000W), coffee maker (1000W), mobile air conditioning (1500W), battery recharging (500W)

Total consumption : ~ 4000 W

Estimated autonomy **infinite** with 1 Wattman & solar panels

Grid security (inverter mode)

Energy back-up in the event of a power cut

with 1 Flywatt

In 5 years of using a Wattman it is :

13 tonnes of CO2 avoided*.

And over €10,000 saved

thanks to mains recharging that costs much less than gas, and zero maintenance costs.

*Compared to a gas-powered unit

PESS ENERGY

Clean mobile power

Our range of battery-powered generators

Working comfort

No noise, no smell, ultra-mobile, lightweight, no maintenance, no cables

Cleaner power

Zero CO2 emissions when in use, solar rechargeable

Versatility

Indoor and outdoor use, hybridisation with a gas unit and/or solar panels,

3 recharging options

Rapid recharging on the mains, using solar energy or at an electric vehicle charging point

Designed and manufactured in France

Bobine

Power : 4000 W
Capacity : 5000 Wh
Weight : 55 kg

CINE EVENT CONSTRUCTION

Wattman

Power : 6000 W
Capacity : 10 000 Wh
Weight : 90 kg

CINE EVENT CONSTRUCTION

Flywatt

Power : 11 000 W
Capacity : 10 000 Wh
Add up power up to 66 kW

CINÉ EVENT

Rock-E

Power : 8000 W
Capacity : 10 000 Wh
Add up power up to 48 kW

CONSTRUCTION URGENCE
